1. Introduction

This document provides an overview of [AX58100 2/3-port EtherCAT slave controller](#).

The AX58100 is a 2/3-port EtherCAT Slave Controller (ESC), licensed from Beckhoff Automation, with two integrated Fast Ethernet PHYs which support 100Mbps full-duplex operation and HP Auto-MDIX. The AX58100 is interoperable with all EtherCAT systems with standard EtherCAT protocols such as CANopen over EtherCAT (CoE), File Access over EtherCAT (FoE), Vendor Specific-protocol over EtherCAT (VoE), etc. The AX58100 provides a cost-effective EtherCAT solution for industrial automation, motion/motor/Digital IO control, Digital to Analog (DAC)/Analog to Digital (ADC) converters control, sensors data acquisition, robotics, etc. industrial fieldbus applications.

The AX58100 provides either a three-channel PWM controller or a Step/Direction controller, and an Incremental (ABZ)/Hall Encoder interface for closed-loop motion/motor control applications; provides a SPI master controller for Digital to Analog (DAC)/Analog to Digital (ADC) converters control applications and sensors data acquisition applications; provides 32 Digital I/Os (DIO) for industrial fieldbus I/O control applications; and also provides an I/O watchdog and an emergency stop input for industrial automation functional safety applications.

The AX58100 provides SPI slave and Local bus Process Data Interfaces (PDI) to provide an easy way for system designers to implement the standard EtherCAT communication functionalities on those traditional non-EtherCAT MCU and DSP industrial platforms. AX58100 supports a configurable individual function SPI slave interface to enhance SPI slave bandwidth.

To help customers to evaluate and develop applications with AX58100 EtherCAT slave controller, ASIX provides comprehensive technical support including reference schematics, PCB design guidelines, hardware/software application notes, user guides, software firmware, etc., and also provides AX58100 evaluation board for designers to easily evaluate the AX58100 EtherCAT slave controller functionalities.

3. Major Features

The following are AX58100 major features,

Fast Ethernet Ports	FMMU	Sync Managers	RAM (Kbytes)	Distributed Clock	Digital I/O	SPI Slave
2 x Internal PHY 1 x MII	8	8	9	64-bit	32-bit	Yes
Local Bus	SPI Master	PWM	Incremental (ABZ)/ Hall Encoder	Emergency Stop Input	Temperature Range (°C)	Package
8/16-bit Async	Yes	Yes	Yes	Yes	-40 ~ +105	LQFP-80

4. Ordering Information

The following is the ordering information of AX58100 and the evaluation boards. Please contact ASIX's Sales (sales@asix.com.tw) for details.

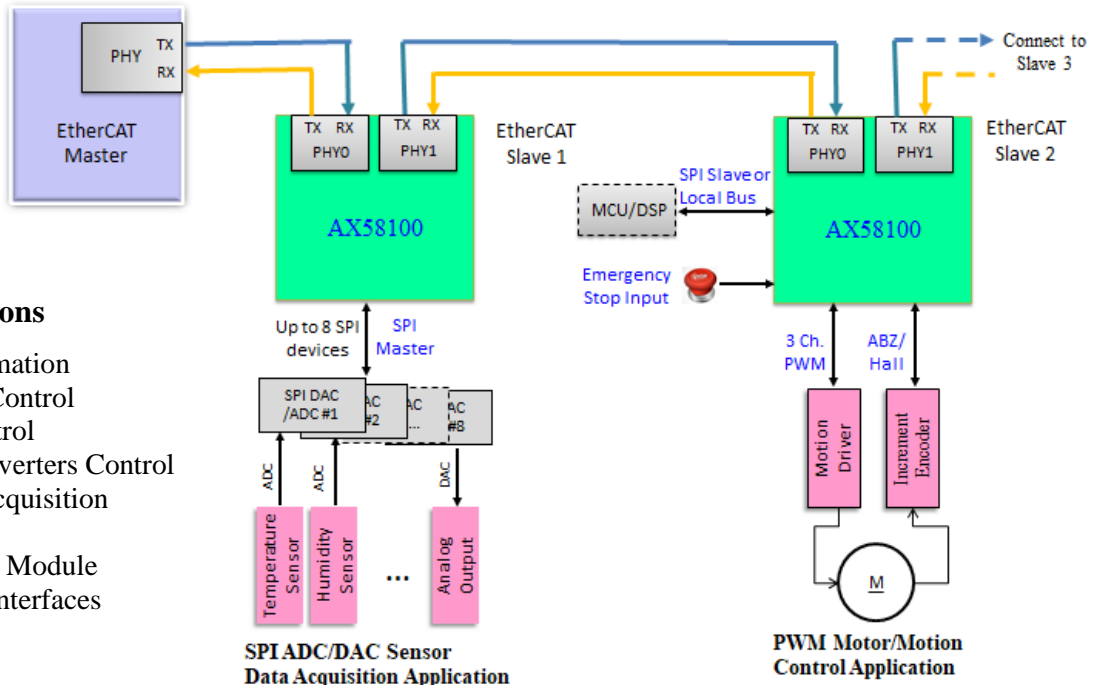

Part Number	Description
AX58100 LT	80-pin LQFP Lead Free package, Industrial temperature range: -40 to 105°C.

AX58100 Evaluation Boards	Description
AX58100-EVB-1 (Copper)	This is an EtherCAT Slave Controller Evaluation Board for AX58100 Copper application
AX58100-EVB-1 (Fiber)	This is an EtherCAT Slave Controller Evaluation Board for AX58100 Fiber application

5. Target Applications

The following are AX58100 typical target applications.

Target Applications

- Industrial Automation
- Motor/Motion Control
- Digital I/O Control
- DAC/ADC Converters Control
- Sensors Data Acquisition
- Robotics
- Communication Module
- Operator HMI Interfaces
